**OPERATION OF AIRCRAFT**

**SAFETY**

**AIRCRAFT OPERATING LIMITATIONS**

Δ Indicates changes.

Δ This AIC replaces AIC 21A6 dated 98-05-15.

Various Operators specify different weights in their Operations Manuals for passengers for the purpose of preparing Mass and Balance calculations and preparation of load and trim documents prior to each flight. Enquires have been received by the CAA from individuals regarding this matter.

The determination of pax weights are published in the SA CATS OPS 91.07.11. These values should be used.

Aircrew are advised that if they feel inadequate weight allowances are made they should discuss this at Safety Forums with their respective Flight Safety Officers.
