Subject: Amendments Related to the GPS Systems

Dear Sir / Madam,

Angola has adopted GPS as mean for Air Navigation support for quite some time.

For that reason, Angola Civil Aviation Authority, INAVIC, in order to conform with ICAO SARPs is required to put in place procedure to allow, whenever there are updates available to the referred system, to have access to the information to proceed accordingly within our state legal framework providing the users with the tools to conduct civil aviation operations in a safe and secure manner.

Therefore, we request your assistance in this subject by, if feasible, providing us with such information, or, by indicating the best way proceed to achieve our goal.

Yours sincerely,

DIRECTOR GENERAL

RUI CARREIRA
