Occurrence Description:

Report of precautionary engine 2 IFSD during approach
The flight crew reported a precautionary engine 2 IFSD during approach due to a low oil pressure indication. An uneventful single-engine landing was performed.

Maintenance personnel found the retaining ring for the Air Turbine Starter (ATS) seal not properly seated in the groove when the ATS was removed. The garlock seal and the retaining ring were removed and replaced and the aircraft was returned to service.

ADDITIONAL INFORMATION:

The Air Turbine Starter (ATS) magnetic carbon seal was changed prior to the event flight.
