NAVIGATIONAL AIDS REPLACEMENT PROGRAMME

This supplement replaces S089/23.

Validity Period: 20 March 2025 – 30 September 2027

Description: The execution of The NAVAID Replacement Programme scope entails the full replacement of terminal (on-airport and off-airport) and en-route navigation aid systems (19 conventional VOR's, 17 DVOR's and 23 DME's - including mobile and training facilities). These systems have been in operation over the last 15 years. The outcomes of the NAVAID Replacement Project include the following:

- Decommissioning of existing equipment and shelters.
- Replacement of shelter / containers and security measures (where applicable).
- Refurbishment of existing buildings and basic security measures (where applicable).
- Replacement of the existing Remote-Control Monitoring and Management System (RCMMS).
- Commissioning flight checks for the facilities prior to commissioning.

This is due to the normal replacement cycle and age of the NAVAIDS Systems for the provision of Air Traffic Control services.

The scheduled unavailability of navigational aids will be updated via NOTAM.
